SEARCH tips
In order to minimize "split" searches, spelling has been standardized to one version as much as possible; for example, accented words in German and French have been anglicized. If searching for a person, just use the surname. If searching for an aircraft, use last three characters of registration mark or try model designation with or without dashes. All accident/incident entries are listed under "Safety". If looking for info on clubs, use chief distinguishing title word(s) (ex. York) or the abbreviation of well-known clubs (ex. MSC for Montreal Soaring Council).

ARCHIVE issues
All the magazine issues from the present back to 1970 are archived as .pdf files, and earlier issues are progressively being constructed as time permits. Pdfs from 1981 and forward are not always precisely identical to the original magazine as only the text was originally saved in the diskette storage era – some photographs or ads were no longer available. Pages were scanned, then the text OCR’ed and placed. Though a more lengthy process than simply scanning each page, this allowed errors in the original text and poorly printed photos to be corrected, making some of these archive copies better than the original.

Issues prior to 1981 are just scanned (but cleaned up, again to correct physical damage to the scanned pages and other problems where found). To go to free flight back issues click on the publication year... 1970
